

Cooking appliances: brief notes

The hob

The full manual is in the drawer below to the left. Pages 50 onwards apply.

To turn on, hold the ON/OFF key down **for at least 3 seconds**.

The oven

Again, the full manual is in the drawer below to the left. The manual appears to have been written using Google translate from the German though perhaps its incomprehensibility is in the original. Anyway, the important point is that the timer has to be set before anything works

To set the time, turn off the oven at its power master switch for at least 2 minutes. Then turn on and you can set the time.
